

UOSD NAD NAPOLI3SUD: SERVICE DATA ANALYSIS

C. Russomanno, D. Sgambati, F. Di Ciaccio, V. Zurlo

UOSD NAD ASL NAPOLI3SUD - Castellammare di Stabia (NA)

Background and aims

There are not many studies in literature on the workloads of Home Artificial Nutrition Unit (HANU). The purpose of the study is to analyze the number of planned nutritional visits to HANU -Napoli3sud. Data were collected randomly by months and dates

Methods

ASL NAPOLI3SUD is composed of 13 districts, 56 municipalities with 1050,000 peoples
The evaluation in realized 1 and 11 February, 24 March and 4 April 2022
In these date are estimate planned nutritional home visits(PNHV) and allocated depending districts.
In the same date are reported home nutritional presence (HNP) performed.

Results

February 1 : 112 PNHV, districts fluctuation (DF) 12.7% - 9% , 12 HNP
February 11: 136 PNHV, DF13.2% - 10% , 13 HNP
March 24: 209 PNHV, DF 14.8% - 3.4%, 17 HNP,
April 4: 223 PNHV, DF 25.2%-12% , 18 HNP

Conclusions

From first data is evident: constant increase total number of planned visit, as reported + 14% (1)
A number part districts demands are non appropriated, about HNP numbers must be considered greatest extension ASLNAPOLI3SUD jurisdiction.
The analysis of districts fluctuation , corrected for the resident population, prove constant and homogeneous requirements growth.
